

## PRODUCT COMPONENT

DEFINITION			
<i>Name</i>	Browser Shots		
<i>Description</i>	Browser Shots is a free screen capture service that lets you submit Web site URLs and returns screen captures of your Web pages as viewed in different browsers, operating systems and screen resolutions.		
<i>Rationale</i>	Most Web developers do not have the hardware/software capability available to test in a wide variety of environments and configurations. Frequently, Web pages will look different across different browsers, operating systems and screen resolutions. Browser Shots provides a centralized point to test your design and ensure cross-browser compatibility.		
<i>Benefits</i>	Browser Shots allows you to: <ul style="list-style-type: none"><li>• see your Web design in several different browsers and in different resolutions,</li><li>• use a bank of volunteer testing machines remotely to test your website, and</li><li>• save time and money.</li></ul>
